Strategic Report

Principal activities and business review

BenevolentAI Limited ('BenevolentAI' or 'the Company' or 'the Group') creates and applies AI and machine learning to transform the way medicines are discovered and developed. The Company has developed the Benevolent Platform®, a disease agnostic drug discovery platform built on powerful data foundations with state of the art machine learning and AI technology. It integrates its technology into every step of the drug discovery process, from hypothesis generation to early-stage clinical development, empowering scientists to decipher the vast and complex code underlying human biology and find new ways to treat diseases. As a result, BenevolentAI has active in-house R&D drug programmes and has research and commercial collaborations with leading pharmaceutical and research organisations.

2020 has been a significant year of scientific and technological progression for BenevolentAI. The Company has progressed and expanded its pipeline during 2020 with a particular highlight of the year being the progression of an in-house programme for the treatment of atopic dermatitis into a Phase 1b clinical study, with the first patient dosed in early 2021.

The Company is proud of the part that the Benevolent Platform® and in-house expertise played in rapidly identifying baricitinib, an approved rheumatoid arthritis drug owned by Eli Lilly, as a potential treatment for Covid-19. This work was published in The Lancet in February 2020 and Eli Lilly announced plans to begin clinical trials in April 2020. Following the success of these trials baricitinib was granted FDA Emergency Use Authorisation in hospitalised COVID-19 patients in November 2020, only nine months after the initial hypothesis was published by BenevolentAI.

BenevolentAI continues to combine its technology approach with in-house drug discovery and development expertise and is also progressing collaborations with external parties. The collaboration with AstraZeneca, which started in 2019, continues to progress and reached a significant project milestone in December 2020 with the selection of a novel AI-Generated Chronic Kidney Disease target.

In November 2020 and January 2021, the Company secured further significant funding from existing and new investors. The funding will be used to further develop the Benevolent Platform® for drug discovery and development, advance the pipeline of internal drug development programmes and progress our collaborations with strategic partners across key therapeutic areas. 2020 saw significant headcount growth, reflecting the focus in acquiring and retaining the best talent in support of our technology and scientific innovation and supporting the expanding pipeline. The hiring focus is oriented to the scaling of portfolio and development activities, required to progress these programmes to their natural inflection points for partnering, consistent with the 2021 Company plans. The Company is able to leverage its existing capacity to support the continued development of the Benevolent Platform®.

Corporate Structure & Reporting

The Group was not subject to any significant changes in corporate structure during 2020, with further modest expansion of the Cambridge facility, matched to the portfolio growth. The Group continues to prepare the 2020 financial statements in accordance with IFRS as adopted by the EU. There have been no new standards having a material impact on the Group for 2020.

EU Exit Review 'Brexit'

The Directors have continued to refresh the original review across the business to assess and address any impact of the exit from the EU before and after the end of the transition period of 31 December 2020. No significant issues have been identified or arisen and the Directors are confident in the Company's ability to continue business as usual post Brexit.

Strategic Report (continued)

Coronavirus COVID-19

The Directors regularly review the impact of the spread of the coronavirus across the world on the business, to the extent possible given the rapidly changing situation. The majority of our work continues to be carried out through remote working. As a consequence of reduced employee numbers accessing the laboratory facilities in Cambridge, a small proportion of work has been outsourced to other laboratory organisations to minimise disruption to experimental work progression. Identified risks and changes have been explored and suitable mitigants identified or put in place to the extent possible. The Directors are satisfied that the impact on the Company is manageable and does not impact its presentation as a going concern.

Key Financials

During 2020, the Group's results were broadly in line with expectations. The Group reported £6.9m of revenue from collaboration agreements (2019: £4.6m). BenevolentAI continues to concentrate on research and development and this is reflected in the rise of research and development and administrative expenses, which were £72.5m for the year (£63.9m for 2019) which has a related increase in the tax credit refunds for research and development, estimated at £10.7m (2019: £11.3m, of which £10.1m relates to 2019 and £1.2m to claim updates for 2018) in the financial statements. Included in the £72.5m is a non-cash employee benefit provision charge of £16.3m which relates to share-based payments (£10.5m for 2019). The business closed the year with net assets of £122.6m, down from £125.5m in 2019.

The financial statements have been prepared on a going concern basis. The Group has received significant cash funds from investors which the Directors, through rigorous assessment of funds, ongoing cash needs and stressing for different scenarios are satisfied that the Group will be able to meet its liabilities as they fall due for at least 12 months from the date of sign off of these financial statements. The Company-only net asset position as at 31 December 2020 is £217.7m (2019: £178.5m).

Principle Risks and Uncertainties

The Company operates in two high potential rewards but also potentially high-risk sectors namely technology development and medicines research, discovery and development. Specific risks include (but are not limited to):

- An inability to keep pace with the rapid change in technology meaning that the Company would lose its competitive edge
- An inability to identify and progress drug candidates successfully through various stages of preclinical and clinical development
- Challenges to the Company's intellectual property portfolio
- · Lack of appropriate future funding to support development of the technology and drug programme pipeline
- An inability to attract and retain the best talent
- Management of Company's growth strategy in a rapid scale-up environment

By order of the board

Mr Kenneth Mulvany Chairman and Director

Date: 22 March 2021

4-8 Maple Street London W1T 5HD

Directors' report

The Directors present their report and the audited financial statements of BenevolentAl Limited (the "Company") for the period 1 January 2020 to 31 December 2020.

Research and development

See the Strategic report on page 2.

Proposed dividend

The Directors do not recommend the payment of a dividend (2019: £nil).

Directors

The Directors who held office during the year were as follows:

Mr Kenneth Mulvany

Professor Ann Jacqueline Hunter

Mr Bart Swanson (resigned 6 March 2020)

Baroness Joanna Shields

Mr Michael Brennan

Mr Jung Ryun Park

Professor Sir Nigel Richard Shadbolt (appointed 1 July 2020)

Political contributions

The Company made no political donations or incurred any political expenditure during this financial year (2019: £nil).

Financial risk management

The Company's finance department manages the risk inherent in the availability of liquid funds in accordance with its corporate policies and use of regular cash flow management.

Disclosure of information to auditor

The Directors who held office at the date of approval of this Directors' report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's auditor is unaware; and each Director has taken all the steps that they ought to have taken as a Director to make themself aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

Auditor

Pursuant to Section 487 of the Companies Act 2006, the auditor will be deemed to be reappointed and KPMG LLP will therefore continue in office.

By order of the board

Chairman and Director Date: 22 March 2021 4-8 Maple Street London W1T 5HD

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE ANNUAL REPORT AND THE FINANCIAL STATEMENTS

The Directors are responsible for preparing the Strategic Report, the Directors' Report and the group and parent company financial statements in accordance with applicable law and regulations.

Company law requires the Directors to prepare group and parent company financial statements for each financial year. Under that law they have elected to prepare both the group and the parent company financial statements in accordance with International Financial Reporting Standards as adopted by the European Union (IFRSs as adopted by the EU).

Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the group and parent company and of the group's profit or loss for that period. In preparing each of the group and parent company financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable, relevant and reliable;
- state whether they have been prepared in accordance with IFRSs as adopted by the EU;
- assess the group and parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the parent company's transactions and disclose with reasonable accuracy at any time the financial position of the parent company and enable them to ensure that its financial statements comply with the Companies Act 2006. They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the group and to prevent and detect fraud and other irregularities.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF BENEVOLENTAL LIMITED

Opinion

We have audited the consolidated financial statements of BenevolentAI Limited ("the company") for the year ended 31 December 2020 which comprise the consolidated statement of profit and loss and other comprehensive income, consolidated and company statement of financial position, consolidated and company statement of changes in equity, consolidated and company cash flow statement and related notes, including the accounting policies in note 1.

In our opinion:

- the financial statements give a true and fair view of the state of the group's and of the parent company's affairs as at 31 December 2020 and of the group's loss for the year then ended;
- the group financial statements have been properly prepared in accordance with International Financial Reporting Standards as adopted by the European Union (IFRSs as adopted by the EU).
- the parent company financial statements have been properly prepared in accordance with IFRSs as adopted by the EU and as applied in accordance with the provisions of the Companies Act 2006; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion,

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We have fulfilled our ethical responsibilities under, and are independent of the group in accordance with, UK ethical requirements including the FRC Ethical Standard. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion.

Going concern

The directors have prepared the financial statements on the going concern basis as they do not intend to liquidate the group or the company or to cease their operations, and as they have concluded that the group and the company's financial position means that this is realistic. They have also concluded that there are no material uncertainties that could have cast significant doubt over their ability to continue as a going concern for at least a year from the date of approval of the financial statements ("the going concern period").

In our evaluation of the directors' conclusions, we considered the inherent risks to the group's business model and analysed how those risks might affect the group and company's financial resources or ability to continue operations over the going concern period.

Our conclusions based on this work:

- we consider that the directors' use of the going concern basis of accounting in the preparation of the group's and company's financial statements is appropriate;
- we have not identified, and concur with the directors' assessment that there is not, a material uncertainty related to events or conditions that, individually or collectively, may cast significant doubt on the group or the company's ability to continue as a going concern for the going concern period.

However, as we cannot predict all future events or conditions and as subsequent events may result in outcomes that are inconsistent with judgements that were reasonable at the time they were made, the above conclusions are not a guarantee that the group or the company will continue in operation.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF BENEVOLENTAL LIMITED (continued)

Fraud and breaches of laws and regulations - ability to detect

Identifying and responding to risks of material misstatement due to fraud

To identify risks of material misstatement due to fraud ("fraud risks") we assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. Our risk assessment procedures included:

- Enquiring of directors as to the Group's high-level policies and procedures to prevent and detect fraud channel for "whistleblowing", as well as whether they have knowledge of any actual, suspected or alleged fraud.
- · Reading Board minutes.
- Considering remuneration incentive schemes and performance targets for management.
- Using analytical procedures to identify any usual or unexpected relationships.

We communicated identified fraud risks throughout the audit team and remained alert to any indications of fraud throughout the audit.

As required by auditing standards, we perform procedures to address the risk of management override of controls, in particular the risk that Group management may be in a position to make inappropriate accounting entries and the risk of bias in accounting estimates and judgements such as provision for impairment and provision for share-based payments. On this audit we do not believe there is a fraud risk related to revenue recognition because it is simple in nature and not a key focus of the Group.

We did not identify any additional fraud risks.

In determining the audit procedures we took into account the results of our evaluation and testing of the operating effectiveness of the Group-wide fraud risk management controls.

We performed procedures including:

• Identifying journal entries and other adjustments to test for all full scope components based on risk criteria and comparing the identified entries to supporting documentation. These included those posted to unusual accounts.

Identifying and responding to risks of material misstatement due to non-compliance with laws and regulations

We identified areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general commercial and sector experience and through discussion with the directors (as required by auditing standards), and discussed with the directors the policies and procedures regarding compliance with laws and regulations.

We communicated identified laws and regulations throughout our team and remained alert to any indications of non-compliance throughout the audit.

The potential effect of these laws and regulations on the financial statements varies considerably.

Firstly, the Group is subject to laws and regulations that directly affect the financial statements including financial reporting legislation (including related companies legislation), distributable profits legislation and taxation legislation and we assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items.

Secondly, the Group is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: health and safety, anti-bribery, clinical trials regulations, employment law and certain aspects of company legislation recognising the nature of the Group's activities. Auditing standards limit the required audit procedures to identify non-compliance with these laws and regulations to enquiry of the directors and other management and inspection of regulatory and legal correspondence, if any. Therefore if a breach of operational regulations is not disclosed to us or evident from relevant correspondence, an audit will not detect that breach.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF BENEVOLENTAL LIMITED (continued)

Context of the ability of the audit to detect fraud or breaches of law or regulation

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remained a higher risk of non-detection of fraud, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. Our audit procedures are designed to detect material misstatement. We are not responsible for preventing non-compliance or fraud and cannot be expected to detect non-compliance with all laws and regulations.

Strategic report and directors' report

The directors are responsible for the strategic report and the directors' report. Our opinion on the financial statements does not cover those reports and we do not express an audit opinion thereon.

Our responsibility is to read the strategic report and the directors' report and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work:

- we have not identified material misstatements in the strategic report and the directors' report;
- in our opinion the information given in those reports for the financial year is consistent with the financial statements; and
- in our opinion those reports have been prepared in accordance with the Companies Act 2006.

Matters on which we are required to report by exception

Under the Companies Act-2006, we are required to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns; or
- · certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

We have nothing to report in these respects.

Directors' responsibilities

As explained more fully in their statement set out on page 5, the directors are responsible for: the preparation of the financial statements and for being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the group and parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF BENEVOLENTAL LIMITED (continued)

Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at www.frc.org.uk/auditorsresponsibilities.

The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Notes

(forming part of the financial statements)

1 Accounting policies

BenevolentAI Limited (the "Company") is a private company incorporated, domiciled and registered in England in the UK. The registered number is 09781806 and the registered address is, 4-8 Maple Street, London, W1T 5HD.

The Group financial statements consolidate those of the Company and its subsidiaries (together referred to as the "Group"). The parent company financial statements present information about the Company as a separate entity and not about its group. The Group financial statements have been prepared and approved by the directors in accordance with International Financial Reporting Standards as adopted by the EU ("Adopted IFRSs").

The accounting policies set out below have, unless otherwise stated, been applied consistently to all periods presented in these financial statements. Judgements made by the directors, in the application of these accounting policies that have significant effect on the financial statements and estimates with a significant risk of material adjustment in the next year are discussed in note 2. All amounts in the financial statements have been rounded to the nearest £1000.

1.2 Measurement convention

The financial statements are prepared on the historical cost basis except financial instruments classified as available for sale are stated at fair value.

1.3 Going concern

The financial statements have been prepared on the going concern basis which the Directors consider appropriate for the following reasons.

The Directors have prepared cash flow forecasts for a period of at least 12 months from the date of approval of these financial statements. These forecasts include severe but plausible downside scenarios which accommodate any continued impact of COVID-19. The key assumptions in the severe but plausible downside scenarios include a change in budgeted revenue and various mitigating actions which the Directors could implement to preserve cash, if needed. These mitigating actions include a reduction in operating expenses. These forecasts indicate that the Group and Company will have sufficient funds to meet their liabilities for the forecast period.

The Group's strong cash position £85.4m (2019: £86.2m) is largely due to issuing equity during the year 31 December 2020 (see note 18). The severe but plausible scenario forecasts indicate that additional funding will not be needed throughout the forecast period. However, the Company continues to be reliant on equity to fund its operations in the medium to long term. The Directors remain confident that when it is required, such further funding will be accessible to the Group.

As a result, the Directors are confident that the Company will have sufficient funds to continue to meet its liabilities as they fall due for at least 12 months from the date of approval of these financial statements and have therefore prepared the financial statements on a going concern basis.

1.4 Basis of consolidation

Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. In assessing control, the Group takes into consideration potential voting rights that are currently exercisable. The acquisition date is the date on which control is transferred to the acquirer. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. Losses applicable to the non-controlling interests in a subsidiary are allocated to the non-controlling interests even if doing so causes the non-controlling interests to have a deficit balance. Under Section 408 of the Companies Act 2006 the Company is exempt from the requirement to present its own statement of comprehensive income.

Notes (continued)

1 Accounting policies (continued)

1.4 Basis of consolidation (continued)

Investments and other financial assets

Investments and other financial assets are initially measured at fair value. Transaction costs are included as part of the initial measurement except for financial assets at fair value through profit or loss. Such assets are subsequently measured at either amortised cost or fair value depending on their classification. Classification is determined based on both the business model within which such assets are held and the contractual cash flow characteristics of the financial asset unless an accounting mismatch is being avoided.

Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated. Unrealised gains arising from transactions with equity-accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

1.5 Foreign currency

Transactions in foreign currencies are translated to the respective functional currencies of Group entities at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are retranslated to the functional currency at the foreign exchange rate ruling at that date. Foreign exchange differences arising on translation are recognised in the income statement. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Non-monetary assets and liabilities denominated in foreign currencies that are stated at fair value are retranslated to the functional currency at foreign exchange rates ruling at the dates the fair value was determined.

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on consolidation, are translated to the Group's presentational currency, Sterling, at foreign exchange rates ruling at the balance sheet date. The revenues and expenses of foreign operations are translated at an average rate for the year where this rate approximates to the foreign exchange rates ruling at the dates of the transactions.

Exchange differences arising from this translation of foreign operations are reported as an item of other comprehensive income and accumulated in the translation reserve. When a foreign operation is disposed of, such that control, or significant influence (as the case may be) is lost, the entire accumulated amount in the foreign currency translation reserve, is recycled to profit or loss as part of the gain or loss on disposal.

1.6 Classification of financial instruments issued by the Company

Following the adoption of IAS 32, financial instruments issued by the Company are treated as equity only to the extent that they meet the following two conditions:

(a) they include no contractual obligations upon the company to deliver cash or other financial assets or to exchange financial assets or financial liabilities with another party under conditions that are potentially unfavourable to the company; and

Notes (continued)

1 Accounting policies (continued)

1.6 Classification of financial instruments issued by the Company (continued)

(b) where the instrument will or may be settled in the company's own equity instruments, it is either a nonderivative that includes no obligation to deliver a variable number of the company's own equity instruments or is a derivative that will be settled by the company's exchanging a fixed amount of cash or other financial assets for a fixed number of its own equity instruments.

To the extent that this definition is not met, the proceeds of issue are classified as a financial liability. Where the instrument so classified takes the legal form of the company's own shares, the amounts presented in these financial statements for called up share capital and share premium account exclude amounts in relation to those shares.

1.7 Non-derivative financial instruments

Non-derivative financial instruments comprise investments in equity, trade and other receivables, cash and cash equivalents, and trade and other payables.

Trade and other receivables

Trade and other receivables are recognised initially at fair value. Subsequent to initial recognition they are measured at amortised cost using the effective interest method, less any impairment losses.

Trade and other payables

Trade and other payables are recognised initially at fair value. Subsequent to initial recognition they are measured at amortised cost using the effective interest method.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits.

1.8 Intangible assets

Goodwill

Goodwill is stated at cost less any accumulated impairment losses. Goodwill is allocated to cash-generating units and is not amortised but is tested annually for impairment.

Research and development

Expenditure on research activities is recognised in the income statement as an expense as incurred.

Expenditure on development activities is capitalised if the product or process is technically and commercially feasible and the Company intends and has the technical ability and sufficient resources to complete development, future economic benefits are probable and if the Company can measure reliably the expenditure attributable to the intangible asset during its development. Development activities involve a plan or design for the production of new or substantially improved products or processes. The expenditure capitalised includes the cost of materials, direct labour and an appropriate proportion of overheads and capitalised borrowing costs. Other development expenditure is recognised in the income statement as an expense as incurred. Capitalised development expenditure is stated at cost less accumulated amortisation and less accumulated impairment losses.

Notes (continued)

1 Accounting policies (continued)

1.8 Intangible assets (continued)

Other Intangible assets

Expenditure on internally generated goodwill and brands is recognised in the income statement as an expense as incurred.

Other intangible assets that are acquired by the Company are stated at cost less accumulated amortisation and less accumulated impairment losses.

Amortisation

Amortisation is charged to the income statement on a straight-line basis over the estimated useful lives of intangible assets unless such lives are indefinite. Intangible assets with an indefinite useful life and goodwill are systematically tested for impairment at each balance sheet date. Other intangible assets are amortised from the date they are available for use. The estimated useful lives are as follows:

- Patents length of patent licence
- Software length of software licence

1.9 Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Where parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment.

Depreciation is charged to the profit and loss account on a straight-line basis over the estimated useful lives of each part of an item of tangible fixed assets. Leased assets are depreciated over the shorter of the lease term and their useful lives. The estimated useful lives are as follows:

laboratory equipment 4 - 10 years

computer equipment 3 years

fixtures and fittings 4 - 5 years

• leasehold improvements life of the lease

Depreciation methods, useful lives and residual values are reviewed if there is an indication of a significant change since last annual reporting date in the pattern by which the company expects to consume an asset's future economic benefits

1.10 Right-of-use assets

A right-of-use asset is recognised at the commencement date of a lease. The right-of-use asset is measured at cost, which comprises the initial amount of the lease liability, adjusted for, as applicable, any lease payments made at or before the commencement date net of any lease incentives received, any initial direct costs incurred and an estimate of costs expected to be incurred for dismantling and removing the underlying asset, and restoring the site or asset.

Right-of-use assets are depreciated on a straight-line basis over the unexpired period of the lease or the estimated useful life of the asset, whichever is the shorter. Where the company expects to obtain ownership of the leased asset at the end of the lease term, the depreciation is over its estimated useful life. Right-of-use assets are subject to impairment or adjusted for any remeasurement of lease liabilities.

The Company has elected not to recognise a right-of-use asset and corresponding lease liability for short-term leases with terms of 12 months or less and leases of low-value assets. Lease payments on these assets are expensed to profit or loss as incurred.

Notes (continued)

1 Accounting policies (continued)

1.11 Business combinations

Business combinations are accounted for using the acquisition method as at the acquisition date, which is the date on which control is transferred to the Group.

The Group measures goodwill at the acquisition date as:

- the fair value of the consideration transferred; plus
- the recognised amount of any non-controlling interests in the acquiree; plus-
- the fair value of the existing equity interest in the acquiree; less
- the net recognised amount (generally fair value) of the identifiable assets acquired and liabilities assumed.
- When the excess is negative, a bargain purchase gain is recognised immediately in profit or loss.
- Costs related to the acquisition, other than those associated with the issue of debt or equity securities, are expensed as incurred.

Any contingent consideration payable is recognised at fair value at the acquisition date. If the contingent consideration is classified as equity, it is not remeasured and settlement is accounted for within equity. Otherwise, subsequent changes to the fair value of the contingent consideration are recognised in profit or loss.

1.12 Impairment

Financial assets (including receivables)

A financial asset not carried at fair value through profit or loss is assessed at each reporting date to determine whether there is objective evidence that it is impaired. A financial asset is impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset that can be estimated reliably.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Interest on the impaired asset continues to be recognised through the unwinding of the discount. When a subsequent event causes the amount of impairment loss to decrease, the decrease in impairment loss is reversed through profit or loss.

Non-financial assets

The carrying amounts of the Company's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit"). The goodwill acquired in a business combination, for the purpose of impairment testing, is allocated to cash-generating units, or ("CGU"). Subject to an operating segment ceiling test, for the purposes of goodwill impairment testing, CGUs to which goodwill has been allocated are aggregated so that the level at which impairment is tested reflects the lowest level at which goodwill is monitored for internal reporting purposes. Goodwill acquired in a business combination is allocated to groups of CGUs that are expected to benefit from the synergies of the combination.

Notes (continued)

1 Accounting policies (continued)

1.12 Impairment (continued)

An impairment loss is recognised if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount. Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the units, and then to reduce the carrying amounts of the other assets in the unit (group of units) on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

1.13 Employee benefits

Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which the company pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognised as an expense in the income statement in the periods during which services are rendered by employees.

Short-term benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be measured reliably.

Share-based payment transactions

Share-based payment arrangements in which the Group receives goods or services as consideration for its own equity instruments are accounted for as equity-settled share-based payment transactions, regardless of how the equity instruments are obtained by the Group.

The grant date fair value of share-based payment awards granted to employees is recognised as an employee expense, with a corresponding increase in equity, over the period that the employees become entitled to the awards. The fair value of the options granted is measured using the Black-Scholes model. The amount recognised as an expense is adjusted to reflect the actual number of awards for which the related service and non-market vesting conditions are expected to be met, such that the amount ultimately recognised as an expense is based on the number of awards that do meet the related service and non-market performance conditions at the vesting date.

Where the Company is part of a group share-based payment plan, it recognises and measures its share-based payment expense on the basis of a reasonable allocation of the expense recognised for the group. The basis of such allocation is disclosed in note 17.

1.14 Revenue recognition

The Group's revenue is generated from licence and collaboration agreements.

Licence and collaboration agreements typically have an initial upfront payment, potential milestone payments for research, development and commercial achievements plus royalties on net sales. Where the initial upfront fee is received in connection with IP licensing agreements, such fees are deferred and recognised by reference to the development costs incurred in developing the drug programme towards the next milestone.

Notes (continued)

1 Accounting policies (continued)

1.14 Revenue recognition (continued)

When the Company receives milestone payments for achieving pre-defined targets during pre-clinical and clinical development, these milestones are recognised when receivable (i.e. on achievement of the pre-defined target) except where the milestone or a proportion of the milestone is to be applied to the development of the programme which is the subject of the licensing agreement. In such circumstances, the income is deferred and recognised as income by reference to the development costs incurred in developing the programme towards the next milestone.

The rules for revenue recognition are stipulated by the accounting standard IFRS 15 which we have adopted in these financial statements.

1.15 Other Income

Other Income is represented by Grant Income and is recognised in the profit and loss account to match it with the expenditure towards which it is intended to contribute.

1.16 Expenses

Operating lease

Payments (excluding costs for services and insurance) made under operating leases are recognised in the profit and loss account on a straight-line basis over the term of the lease where these are short-term leases with a period remaining of less than 12 months or for low value. Other leases that are assessed under IFRS 16 as finance leases have been accounted for in accordance with IFRS.

1.17 Taxations

Tax on the profit or loss for the year comprises current and deferred tax. Tax is recognised in the income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided on temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: the initial recognition of goodwill; the initial recognition of assets or liabilities that affect neither accounting nor taxable profit other than in a business combination, and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised.

1.18 Issued capital

Ordinary, preference and growth shares are classified as equity. Proceeds in excess of the par value of the shares are shown as share premium in equity and incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction of share premium, net of tax, from the proceeds.

1.19 Provisions

A provision is recognised in the balance sheet when the Company has a present legal or constructive obligation as a result of a past event, that can be reliably measured and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects risks specific to the liability.

2 Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other relevant factors, including management's reasonable expectations of future events. The preparation of the financial statements requires management to make estimates and assumptions concerning the future. The resulting accounting judgements and estimates may differ materially from these estimates due to changes including but not limited to those in general economic conditions and law and regulations. The following is a summary of the critical accounting estimates that were made in preparing these financial statements.

Goodwill and Intangible Assets

The amount of goodwill and intangible assets initially recognised as a result of a business combination is dependent on the allocation of the purchase price to the fair value of the identifiable assets acquired and the liabilities assumed. The determination of the fair value of the assets and liabilities is based, to a considerable extent, on management's judgement and based on industry benchmarks and information relevant to the specific assets in focus.

The carrying value of goodwill and intangibles requires the assessment of discounted future cashflows of the future economic value of the underlying assets. The assumptions and critical judgement required from management is inherently uncertain though based on recognised industry methods of evaluating drug programme assets and companies undertaking drug discovery activities. Management engaged an independent expert to review the company's evaluation of the key data including the sources of uncertainty to arrive at their own view in assessing the potential value of the underlying assets.

Management used industry practice in its method of evaluating the estimate of future revenue streams of drug programmes, associated costs together with market data for the therapeutic areas of interest, discount rates for cost of capital, risk factors including probabilities of progressing a candidate to commercialisation or earlier partnering of a programme and other relevant factors.

Management have further considered the positive progress identified to date from the acquisition of BenevolentAI Cambridge Limited with value anticipated to arise from already identified specific programmes in addition to the ongoing value creation from the underlying assets.

The external assessment supported Management's conclusion that the carrying values of goodwill and intangibles do not require impairment.

Share-based payments provision

The group operates an unapproved Share Option Plan. All employees are offered options upon joining the Group. The fair value of share options granted is measured using the Black-Scholes model at each reporting date taking into account various assumptions detailed in note 17. The full charge of the vested options during the year is recognised in the profit and loss.

A deferred tax asset of £31.6m (2019: £25.7m), relating to losses, has not been recognised due to uncertainties over future profitability.

A UK corporation rate of 19% (effective 1 April 2020) was substantively enacted on 17 March 2020, reversing the previously enacted reduction in the rate from 19% to 17%. The effective tax rate for year ended 31 December 2020 is 19% (2019: 19%). The deferred tax liability has been calculated using 19% (2019: 17%). Changes to the UK corporation tax rates which were announced in the Budget on 3 March 2021 to take effect from 1 April 2023 have yet to be substantively enacted. This will impact the company's future tax accordingly.

'Impairment

Management have undertaken a review of the intangible assets for indicators of impairment.

Patents

The balance at the start and end of the financial year reflects the 10% economic interest of an asset currently in a Phase 1 trial, with commencement of dosing of the first patients in 2019. On the basis of management's preparation of a risk adjusted net present value calculation, independently reviewed, management do not believe there to be any indicators of impairment at year end.

Software

Modest balances relate to software intangibles representing domain names and software, all of which are integrated and fully used in the business and subject to amortization. Management do not believe there to be any indicators of impairment for these items.

Goodwill

During the year, goodwill was tested for impairment in accordance with IAS 36 Impairment of Assets. For the purposes of impairment testing, goodwill has been allocated to the Group's CGUs defined as the whole of the BenevolentAI Cambridge entity. The Directors used a more conservative approach for some of the underlying assumptions than those used in the review undertaken in respect of the 2019 year-end. On that basis, and also allowing for the fluctuation in the US dollar to pound sterling since the values are calculated in US dollars, the recoverable amount continues to exceed the carrying value of the measured portion of the CGU by over 380% (2019: 500%) meaning there is sufficient headroom and Management, based on their review, do not believe there to be any reasonably possible downsides in any of the key assumptions that would require an impairment charge at the balance sheet date. This was additionally supported through the independent valuation of the applicable assets.

The impairment review was performed by comparing the carrying amount of the cash generating unit to which goodwill has been allocated. Recoverable amounts for cash-generating units are the higher of fair value less costs of disposal, and value in use.

The recoverable amount of this CGU was based on fair value less costs of disposal, estimated using risk adjusted discounted cash flows. The fair value measurement was categorised as a Level 3 fair value based on the inputs in the valuation technique used. The key assumptions used in the estimation of the recoverable amount are set out below. The values assigned to the key assumptions represent management's assessment of future trends in the relevant industries and have been based on historical data from both external and internal sources. The assessment excludes any measurement of terminal value.

Time to peak Market Penetration	6 years	6 years
Expected Market Growth Rate	5.8%	5.8%
Discount Rate	12%	12%
Assumptions	2020	2019

The discount rate (present value) is a pre-tax measurement reflecting an expected return that investors would expect, consistent with that used routinely across the Company for all valuation activities and in our business modelling. The rate is within a range that experienced investors would typically use when assessing a drug IP valuation. This is combined with the probabilities of reaching the next stage of development to establish the overall risk adjusted net present value. The Directors have assessed the sensitivity of the discount rate used and have concluded that even using a discount rate of over 25% would continue to provide sufficient headroom to the value at year end.

Revenue growth at 5.8% was derived from a study showing the expected future growth rates for the Pharma industry over time

Time to peak market penetration was established through research of drug launch curves, showing that on average this was reached in 6 years.

17 Employee benefits

Defined contribution plans

Group and company

The Group operates a defined contribution pension plan.

The total expense relating to this plan in the current year was £964k (2019: £663k). There was an accrual of £nil at 31 December 2020 (2019: £1k).

Share based payments (SBP)

Group and company

The Group operates an unapproved Share Option Plan. All employees are offered options or Restricted Stock Units (RSUs) upon joining the company. RSUs operate in such a way as to give the same economic benefit as options, reflecting the requirements of certain jurisdictions. During the year 93,455 options and 21,772 RSUs were granted to employees and others under the unapproved Share Option Plan, and 56,476 were forfeited due to the grantees no longer being employed by the Group or forfeiting their options.

For certain senior executives within the Company, the number of RSUs awarded is variable so as to achieve a specific fixed economic outcome which may not require the full amount of RSUs to be deployed depending upon the intrinsic value on trigger. The RSUs operate economically in the same way as comparable options, with equivalent fair value share-based payment costs.

Growth Shares granted to-date with a collar prevent participation in any equity holder distributions until the price is above £446.88. The fair value of the growth shares needs to be looked at in the round with any corresponding RSU award that partners these instruments. Given the mechanics and using the expected fair value measurement tools (Black-Scholes) the fair value attributed to the growth shares is £nil, as is the charge for the year (2019: £nil).

SBP for options are recognised evenly over the service period from date of grant. If not exercised options lapse on the 10th anniversary of the date of grant, with the lapse period for RSUs being 7 years. The ultimate vesting of options and RSUs is connected to a trigger event, at which point the ability to exercise manifests with a method of settlement being through equity only. No options were exercised and no RSU agreements were settled during the year.

The number and weighted average exercise prices of share options are as follows:

Options and RSUs held in BenevolentAI Limited	Weighted average exercise price (pounds)	Number of options	Weighted average exercise price (pounds)	Number of options	
	. 2020	2020	2019	2019	
Options Outstanding at the beginning of the year	126.5	170,876	436.2	105,762	
Forfeited during the year	(234.2)	(56,476)	(599.2)	(42,992)	
Exercised during the year Granted during the year Committed during the year	0.1	115,227	12.6 0.1	98,957 9,149	
Outstanding at the end of the year	36.6	229,627	126.5	170,876	
Exercisable at the end of the year				-	

Notes (continued)

17 Employee benefits (continued)

The fair value of services received in return for share options granted are measured by reference to the fair value of goods or services received or reference to the fair value of share options granted.

As permitted under IFRS 2, the Black-Scholes model has been used to calculate the fair value of each option and RSU at the date of grant. The fair value of each option and RSU is recognised equally over the service requirement period (usually 3 to 4 years) through the profit and loss and will not be remeasured at each reporting date.

In order to calculate the fair value of share options using the Black-Scholes model, the assumptions in the following table have been used. As the Group grants new share options and RSUs at regular intervals, the weighted average of outstanding share options and RSUs at the end of the financial year has been disclosed.

Weighted Avg. for outstanding options and RSUs at the reporting date	2020	. 2019
Market value at date of grant	£346	£392
Exercise price at grant date	£37	£127
Volatility	60%	60%
Time to exercise (years)	4.0	5.2
Risk-free rate	0.75%	1.34%
Employee turnover	12%	13%

The expected volatility is based upon analysis of historic share price movements of the Group's own securities. The expected period to exercise is based upon management's judgement, with reference to benchmark data of the typical time from incorporation to an Initial Public Offering amongst other companies in Technology industries. The risk-free rate is based on the Bank of England's estimates of gilt yield curve as at the respective grant dates.

The holders of Ordinary and A Preference shares rank pari passu in respect of voting and dividend rights as well as participating in the drag along rights. Ordinary shares rank behind the A Preference shares in the order of priority in respect of capital distribution rights on winding up.

Restricted ordinary shares are non-transferrable and do not confer any voting, dividend or capital distribution rights.

G2 Growth shares do not confer any voting or dividend rights prior to an exit. Capital distribution rights rank behind A Preference shares and ordinary shares, with distributions only applying when the distribution per share exceeds a specific threshold.

19 Financial instruments

Fair values of financial instruments

The fair values of all financial assets and financial liabilities by class together with their carrying amounts shown in the balance sheet are as follows:

the balance sheet are as fortows.	Group		Compa

Notes (continued)

19 Financial instruments (continued)

Risk Management

The Group's principal financial instruments comprise cash at bank, trade payables and other receivables and the main purpose of these financial instruments is to facilitate the Company's operations.

Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Company's receivables from customers and investment securities.

The Group currently does not have a provision for bad debt based on historic and current experience with relevant parties, consequently exposure to expected credit losses is nil.

Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they come due. The Group expects to meet its financial obligations through operating and financing cashflows.

The following are the contractual maturities of financial liabilities, including estimated interest payments and excluding the effect of netting agreements:

		31 December 2020				
	• .	Carrying amount	1 year or less	1 to <2 years	2 to <5 years	5years and over
-	•	£000	£000	£000	£000	£000
Non-derivative financial liabilities Trade and other payables		9,569	9,569	•	-	_
	٠.	•	÷	•		
•			31 D	ecember 2019		
		Carrying amount	1 year or less	1 to <2years	2 to <5 years	5years and over
Non-derivative financial liabilities		£000	£000	£000	£000	£000
Trade and other payables		9,461	9,461	· ·		

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Group income or the value of its holdings of financial instruments. The Group does not have any exposure to interest rate risk nor changes in quoted equity prices, but it is exposed to foreign exchange rates.

19 Financial instruments (continued)

Foreign currency risk

The Group's exposure to foreign currency risk is as follows. This is based on the carrying amount for monetary financial instruments except derivatives when it is based on notional amounts

31 December 2020	Euro	US Dollar	Japanese Yen	British	, Total
	£000	£000	£000	Pound £000	£000
Cash and cash equivalents Trade Payables	389 (396)	8,138 (1,634)	· -	76,844 (1,732)	85,371 (3,762)
Net exposure		6,504	-	75,112	81,609
31 December 2019	Euro £000	US Dollar £000	Japanese Yen £000	British Pound £000	Total £000
Cash and cash equivalents Trade Payables	1,012 (856)	3,794 (192)	43 (3)	81,393 (1,645)	86,242 (2,696)
Net exposure	156	3,602	40	79,748	83,546

A 10 percent weakening of the following currencies against the pound sterling at 31 December 2020 would have increased profit or loss by the amounts shown below. This calculation assumes that the change occurred at the balance sheet date and had been applied to risk exposures existing at that date.

This analysis assumes that all other variables, in particular other exchange rates and interest rates, remain constant. The analysis is performed on the same basis for 31 December 2019.

Sensitivity analysis

	•	i		2020	2019
•	•		•	€000	£000
€				1	(16)
\$			•	(650)	(360)
¥		•		·	(4)

A 10 percent strengthening of the above currencies against the pound at 31 December 2020 would have had the equalbut opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

Bank credit ratings

The cash and cash equivalents are held with bank and financial institution counterparties, which are rated A+ and above, based on Fitch credit ratings as at 31 December 2020, which is at minimum a positive outlook. The Group considers that its cash and cash equivalents have low credit risk based on the external ratings.

Notes (continued)

20 Related party transactions

Identity of related parties with which the Company has transacted
